

Electric pallet truck

24 VOLT

Capacity from 1.300 to 3.000kg

CLARK®
THE FORKLIFT

OUR POWER PALLET TRUCKS

CPT 13 ac
1,3t capacity

CPT 16/20 ac
1,6 - 2,0t capacity

CPT 30
3,0t capacity

CPTi 16 ac
1,6t capacity

C PTP 20 ac
2,0t capacity

CSPT 20 ac
2,0t capacity

CRPT 30 ac
3,0t capacity

Individual, flexible and certainly the best solution

No matter for which application you may need a pallet truck. With our extensive product range of pallet trucks you will always have the right truck for your materials handling needs. We offer the right solution for every industrial application from occasional use up to the most intensive.

100%

Monoblock construction

The monoblock design frame avoids stresses on the welds and maintains a higher mechanical strength during storage and retrieval. Easy access of the battery compartment simplifies charging, care and maintenance of the battery. Our focus during the development of these trucks was on high quality components to ensure the lowest possible maintenance costs.

**Diversity + reliability + efficiency =
The right solution for every application.**

STANDARD FEATURES & BENEFITS

Charging technology:

Energy and cost saving charging technology provided direct via the CLARK factory.

Integrated chargers are available for many models. By the availability of high frequency chargers, electrolyte circulation and water refilling systems - you always get exactly the charging technology you need.

Easy to use for error-free operation:

The ergonomically designed tiller arm combines industrial strength together with ease of use, ensuring every control command can be implemented quickly and easily.

When the tiller arm is released, it returns automatically to the neutral position, applying automatic braking.

AC systems / motor:

The powerful drive motor is controlled precisely by the travel switch on the handle. The motor only gets exactly the power level required.

The microprocessor control can be set with a service console to the exact requirements of the application. This ensures maximum performance with minimum power consumption.

By an energy recovery system, power is directed back into the battery.

The quiet lift motor has excellent torque together with high performance and low power consumption. The high performance hydraulic pump is equally quiet together with a high flow rate.

Available Options:

- double load wheel
- non-slip rubber drive wheel
- side battery change
- battery changing facilities
- pin access keypad
- cold store execution
- platform - max. 6km / h (only for CPT 20 P ac)
- built-in battery charger
- supertrack traction wheel

Five-point chassis for stability and control and entry and exit rollers:

Optimal stability and durability is achieved by a 5-point chassis. Even with intensive use, the forces are distributed in the best possible way.

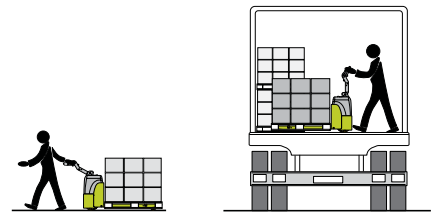

The 8mm steel frame minimises distortion and stress of the welds and offers greater stability and strength. The entry and exit rollers, make pallet entry and exit easy and reduces pallet damage.

THE RIGHT SOLUTION FOR EVERY APPLICATION

CPT13 ac – The truck for less intensive use:

CPT13 The ideal pallet truck and solution for on vehicle applications. Thanks to its compact dimensions and high manoeuvrability it is ideal for use in confined spaces due to a L2 Measurement of only 394mm.

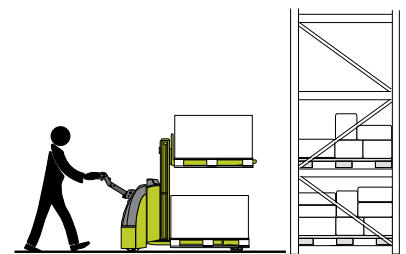

CPT16/20 ac - Powerful pallet trucks for all applications:

The CPT16/20 models with compact design and high set handle allows easy handling in confined spaces. With batteries up to 250Ah capacity a long term working shift is possible. The CPT30 can also be adapted in a special construction to specific customer needs (eg for transporting large paper rolls).

CPTi16 ac - pallet truck is designed for order picking and light stacking operations:

The CPTi16 combines the ability of the pallet truck (1,600 kg capacity) with the quality of a pallet stacker (1,000 kg capacity) up to a lift height of 1500 mm. Perfect for the transport of loads in tight spaces, narrow aisles and the need of order picking or stacking.

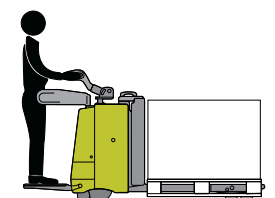

CSPT20 / CRPT30 ac - The Pallet truck to ride on:

The models CSPT20 and CRPT30 are ideal for on-site transport with long distances. The CSPT20 with a truck width of 790mm is ideal for block storage. The CRPT30 with drivers seat is ideally suited for the continuous in-house transportation of goods.

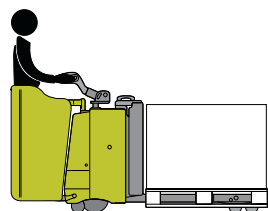

CPTP20 ac - powered pallet truck with platform:

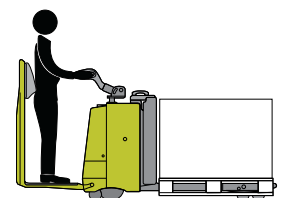

The CPTP20ac with AC technology (AC) and folding platform, ensures powerful and high performance. Designed for transporting loads over long distances, and for loading and unloading at the ramp and in the container. A platform damping system minimises vibration when driving and on a ramp.

The CPTP20ac with fixed side guards. This variant provides optimum support when cornering and thus supports the driver in all operations. A platform damping device minimises vibration when driving on a ramp.

The CPTP20ac with fixed backrest allows for a side exit enabling easy access of the load from both sides. A platform damping minimizes vibration when driving and on the ramp.
